About Me

Data Engineer with 4+ years of experience building data integration, processing and analytics pipelines with Python and SQL in the insurance industry, now focusing on **geospatial data engineering, spatial analytics and remote sensing**.

Previously spent 7 years in viticulture, where I developed automated GIS and data workflows using QGIS, QField, Python and cadastral data. Author of *Getting Started with Taipy* (Packt, 2025), open-source contributor and technical writer.

Skills		
Programming		
Python	Primary language. Data processing, automation, applications and data pipelines	★★★★★
SQL	Advanced SQL for analytics, integration and data warehousing	★★★★★
Data Engineering		
ETL	Data integration, transformation and pipeline development	★★★★★
Apache Spark	Distributed processing and large-scale data analysis	★★★★☆
DuckDB	Analytical processing and modern data workflows	★★★★☆
Databases		
PostgreSQL	Relational databases, analytical SQL and data engineering	★★★★★
PostGIS	Spatial databases and geospatial data processing	★★★★☆
Geospatial		
QGIS	GIS analysis, geoprocessing, cartography and data management	★★★★☆
GeoPandas	Geospatial data processing with Python	★★★★☆
Remote Sensing	Sentinel-2, NDVI and satellite-derived analytics	★★★★☆
Data Applications		
Taipy / Streamlit / Plotly	Interactive Python applications for data and analytics	★★★★★
Systems		
Git	Version control and collaborative software development	★★★★☆
Linux	Linux-based development and data workflows	★★★★☆

Languages		
 English	Fluent	★★★★☆
 Spanish	Native	★★★★★
 French	Native	★★★★★

2006 – 2010 | B.Sc. Biology – Universidad Autónoma de Madrid
